

**TO ASSEMBLE THIS,
YOU'LL NEED THE
FOLLOWING TOOLS:**

**4MM LONG ALLEN KEY
(THERE'LL BE ONE IN YOUR
TOOL BOX)**

POZIDRIVE SCREWDRIVER

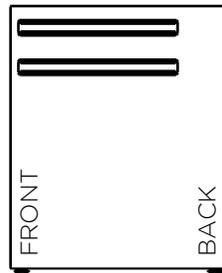

LAMELLO

Unlike traditional cam fixings, the fixings we use are designed not to be seen when the unit is assembled. To fit them, simply align the pair of fixings, and use an allen key in the adjacent hole to join twist the lever from one into the other.

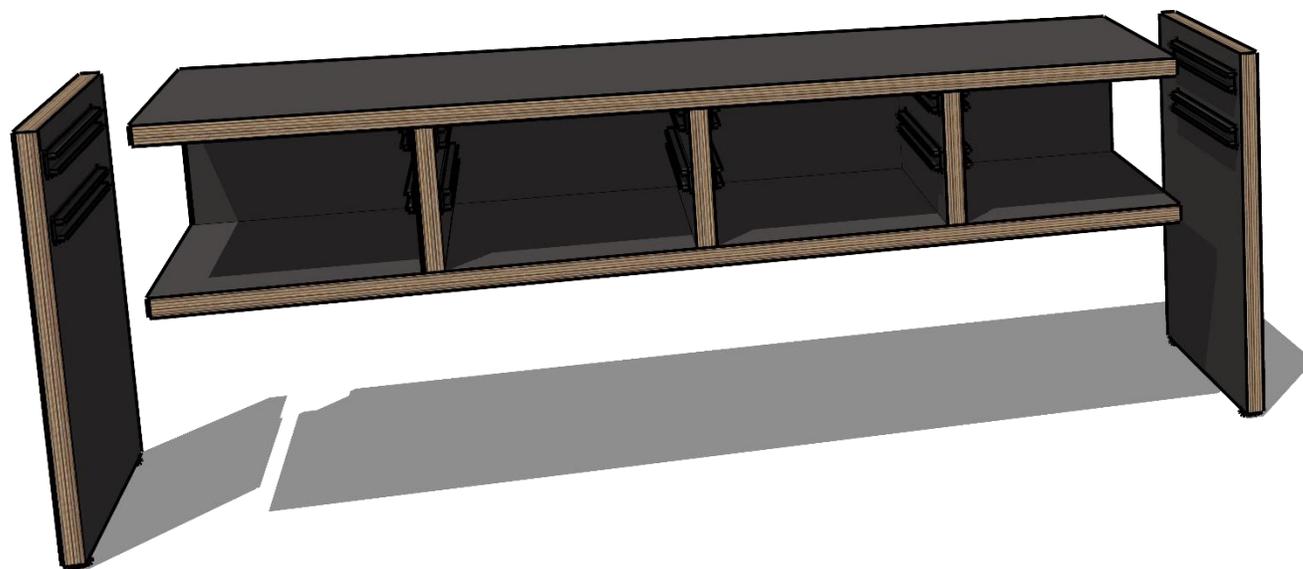

1

First, fit runners to the left and right hand side panels (they are mirror images of each other) making sure you put left hand runners on the left hand panel, and vice versa. The L or R stamped on the runner should be to the front.

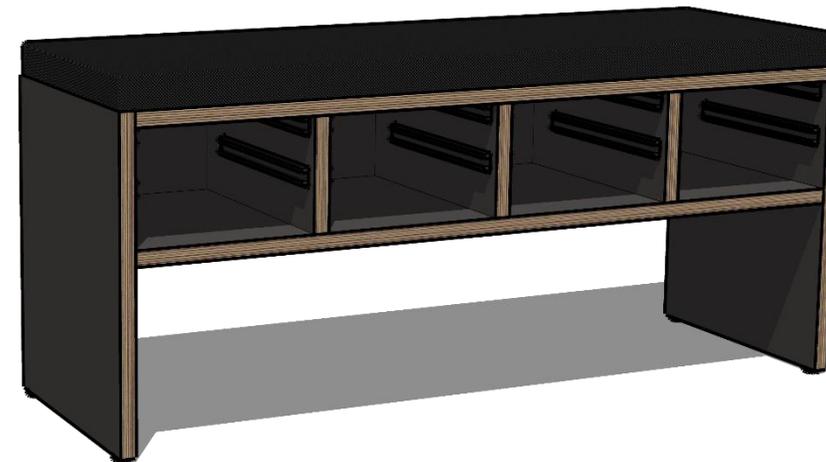

Left hand panel shown

Then fit the side panels to the tray assembly using the Lamello fittings. Finally, add the four adjustable feet to the bottom of the side panels.

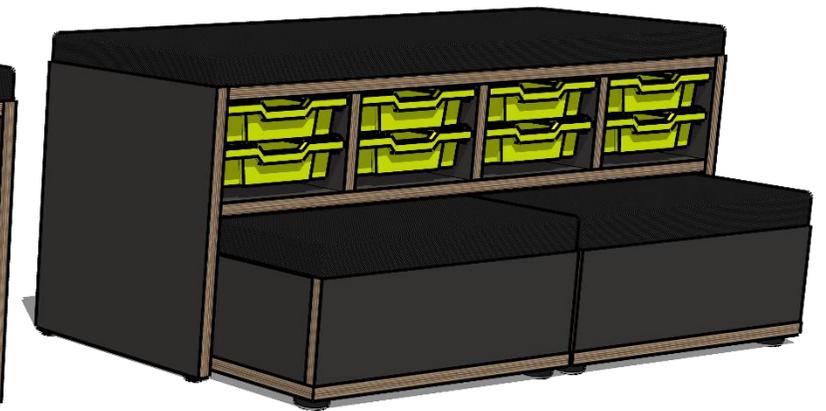

2

Fix the upholstered cushion to the top of the unit by screwing up from the underside of the top panel. There are 8 holes central to each of the tray recesses - one at the front and one at the back.

3

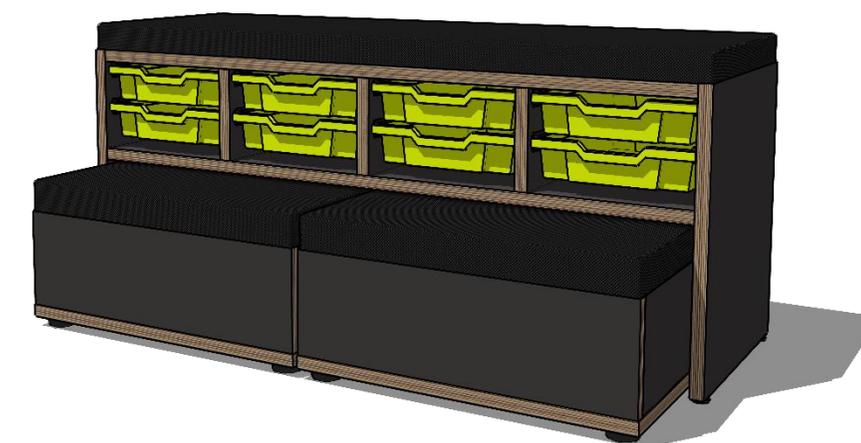

Slide in the trays - you need to tip them up so they slide under the front 'anti-tilt' bar - and add the two storage box seats underneath.
